Professional Summary

Computer Science undergraduate and Machine Learning practitioner with hands-on experience in Python, SQL, Scikit-Learn, PyTorch, XGBoost, NLP, data preprocessing, exploratory data analysis, feature engineering, model evaluation, and deployment. Built end-to-end machine learning applications for prediction, classification, sentiment analysis, and time-series forecasting. Experienced with Streamlit, FastAPI, Docker, Git, and GitHub.

Technical Skills

Programming: Python, SQL **Machine Learning:** Scikit-Learn, XGBoost, Linear Regression, Random Forest, ARIMA, Classification, Regression

Deep Learning: PyTorch, Neural Networks, Transformer Models, BERT **NLP:** NLTK, TF-IDF, Tokenization, Lemmatization, Sentiment Analysis

Data Science: Pandas, NumPy, SciPy, Matplotlib, EDA, Data Cleaning, Feature Engineering, Statistical Analysis, Time-Series Analysis

Deployment and Tools: Streamlit, FastAPI, Docker, Git, GitHub, Jupyter Notebook, VS Code, Cross-Validation, Hyperparameter Tuning

Experience

AI Strategy and Business Intelligence Intern

IBM SkillsBuild – CSRBOX, in association with AICTE

Mar 2026 – Apr 2026

Remote

- Applied AI strategy, business intelligence, and data analysis frameworks to real-world organizational problems during a 6-week internship.
- Analyzed organizational data pipelines and identified 5+ key performance indicators (KPIs) to support data-driven decision-making and performance measurement.

Projects

Score Forecasting System

Python, Scikit-Learn, XGBoost, Streamlit

- Reduced prediction error by up to 50% by developing Linear Regression and XGBoost forecasting models for sports and financial prediction use cases.
- Engineered predictive features from 3+ years of historical data and improved model performance through preprocessing, cross-validation, and hyperparameter tuning.

Restaurant Reviews Sentiment Analysis

Python, NLTK, Scikit-Learn, TF-IDF, Random Forest, Streamlit

- Achieved 88% classification accuracy using TF-IDF and Random Forest on 1,000+ restaurant reviews for automated sentiment classification.
- Improved NLP model input quality through tokenization, stop-word removal, lemmatization, data cleaning, and exploratory data analysis.

Hackathons

- Adobe Hackathon:** Participated in a competitive technology challenge focused on innovative product development and problem solving.
- Mindscape Hackathon:** Applied programming and analytical skills under time constraints to develop a solution prototype.

Education

Bachelor of Technology in Computer Science

Shobhit Institute of Engineering and Technology, Meerut, Uttar Pradesh

Aug 2023 – 2027

GPA: 8.92/10

Higher Secondary, Class XII – Physics, Chemistry, Mathematics

S.N.S.R.K.S College, Saharsa, Bihar – Bihar School Examination Board

2023

Percentage: 68.2%

Secondary, Class X

Utkramit Madhyamik Vidyalaya Dhanupura, Saharsa, Bihar – Bihar School Examination Board

2021

Percentage: 75.6%

Certifications

- Kaggle:** 5-Day AI Agents – Intensive Vibe Coding Course, Jul 2026
- Udemy:** Complete Data Science, Machine Learning, Deep Learning, and NLP Bootcamp, May 2026
- Cisco Networking Academy:** Introduction to Data Science, Feb 2026
- Simplilearn:** Transformer Models and BERT Model, Jan 2026
- Oracle University:** Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate, Sep 2025
